PROFESSIONAL SUMMARY

Results-driven COREN-certified Mechanical Engineer with 6+ years of specialized experience optimizing downstream retail assets, LPG facilities, and building services. Proven track record of executing comprehensive preventive and corrective maintenance schedules, controlling operational budgets, and tracking critical KPIs to maximize equipment uptime and asset reliability. Adept at leading cross-functional teams, managing contractor performance, and enforcing strict O&G HSE protocols, including PTW, LOTO, and JHA, to guarantee full regulatory compliance with NMDPRA, SON, and NESREA standards.

CORE COMPETENCIES

- **Asset Management:** Retail & LPG Facility Maintenance | Generator & Pump Systems | ATG/ATGS | HVAC & Building Services.
- **HSE & Compliance:** Permit-to-Work (PTW) | Lock-out/Tag-out (LOTO) | Job Hazard Analysis (JHA) | Regulatory Audits (NMDPRA, SON).
- **Operations:** Preventive & Corrective Maintenance Planning | Contractor & Vendor Management | Inventory & Spare Parts Control.
- **Commercial:** Maintenance Budgeting | Cost Control | KPI Tracking (Uptime/MTTR) | CMMS & Work Order Management.

PROFESSIONAL EXPERIENCE

Regional Engineer - West 2024 to Current

Pinnacle Oil & Gas Limited

- Executed routine and non-routine preventive maintenance schedules across a multi-site network of downstream retail stations and facilities, ensuring 98% equipment uptime for critical assets including dispensing pumps, ATGs, and backup generators.
- Enforced strict HSE compliance during maintenance activities by implementing Permit-to-Work (PTW), Lock-out/Tag-out (LOTO), and Job Hazard Analyses (JHA), achieving zero Lost Time Incidents (LTI) while managing third-party contractor performance.
- Directed the end-to-end maintenance budget for the region, tracking variances and optimizing spare parts procurement to reduce operational expenditure (OPEX) without compromising asset integrity.

Retail Outlet Manager 2022 to 2024

Eterna PLC

- Spearheaded the commercial and operational turnaround of a retail outlet by acting as the lead technical consultant to revive failing forecourt equipment; successfully restored optimal station capacity, which directly drove increased daily sales revenue and operational profitability.
- Monitored asset integrity and coordinated statutory inspections (e.g., UST calibration, meter readings) to ensure strict adherence to downstream regulatory standards (NMDPRA and SON), directly mitigating safety risks and service disruptions.

- Managed daily reconciliation of station wet stock and cash lodgments, ensuring 100% financial accuracy and identifying root causes of inventory variance.

Technician (Contract)

2021 to Jan 2024

Wayne West Africa

- Executed advanced diagnostics and rapid-response corrective repairs on safety-critical forecourt assets and emergency shutdown systems (ESD), reducing average maintenance response time by 30% and significantly mitigating operational downtime.
- Delivered consistent field support and technical reporting, serving as the primary liaison between station management and technical engineering teams to resolve complex mechanical failures.

Branch Maintenance Technician

2017 to Aug 2021

OVH Energy (Oando Licensee)

- Directed Maintained critical retail station equipment (pumps, generators, ATG systems) across assigned territory, ensuring assets remained fit-for-purpose and safe for daily operations.
- Conducted rigorous facility inspections and supervised external contractors to ensure quality execution of maintenance works in line with company HSE policies.

KEY PROJECTS & TECHNICAL INITIATIVES

UST Calibration & Inventory Audit | Oando & Advance Link Stations

- Directed a critical UST calibration campaign across high-volume sites to diagnose and resolve persistent inventory discrepancies caused by supply shortages and tolerance drift.
- Result: Successfully restored tank accuracy to within statutory limits, reconciled wet stock data variances, and mitigated financial losses, ensuring full compliance with industry tolerance standards.

HOTR CSR Sanitation Project | Project Manager

- Led a community sanitation initiative, managing stakeholder communications, resource allocation, and project timelines to deliver environmental improvements in line with Corporate Social Responsibility (CSR) goals.

EDUCATION

B.Eng Mechanical Engineering

2007 - 2012

Federal University of Technology Minna.

TRAINING AND CERTIFICATIONS

- **Registered Engineer** | Council for the Regulation of Engineering in Nigeria (COREN)
- **Corporate Member** | Nigerian Society of Engineers (MNSE).
